

OCCUPANTS OF RAILWAY HOUSES IN THE OTIRA VILLAGE (1920s-early 1990s)

Version 11: 23 February 2026

(Note: latest change is in red)

The following list relates to the railway houses in the Otira village and complements information on the houses contained in *Railway through the Rata: Memories of Otira*. Refer to the 1974 plan of houses on page 313 which shows all except Nos. 465, 498, 560 and 467 (in order from the school heading towards the station). By this time, No. 560 was the only surviving house of these four.

The oldest house was No. 467 which dated from around 1900. It was the stationmaster's house and after the tunnel opened in 1923 was in the section adjacent to House 559. In 1940, St Christopher's church was built on the section on the school side of No. 467. Two further houses, Nos. 498 and 465, appear to date from around 1906. They were next to the school fronting the railway. No. 560 was built between No. 498 and the section on which the church was later built.

Nos. 518 to 560 inclusive were all built in 1922/23 for the opening of the Otira tunnel. The only railway house which was built in the village after the opening of the tunnel was in 1951 and was numbered B707.

Gathering information about the occupancy of the houses in the 'railway era' (up until around 1991) was a long and involved process owing to the fact that while the research for *Railway through the Rata* was being carried out (in the 2010-12 period) only limited information was found on railway files. At that time, it appeared that the records that recorded rent payments etc. had been lost or destroyed, but in 2020 the author was made aware of surviving copies of the NZR Register of Dwellings held in Archives New Zealand, which contain an essentially complete record of occupants between about the mid-1950s and mid-1970s for the houses built to A.B. Plan 18&19 (e.g. no. 520) and A.B. Plan 137 (e.g. no. 521). That information has been included in version 9, with the exception of B707 which is yet to be updated.

Note that where new names appeared in the NZR Register of Dwellings, those entries have been added in blue. The job designations are those in the register which don't necessarily correspond exactly to the job title given at the time in Otira. For example, a 'temporary labourer' would probably normally equate to a 'surfaceman'.

In the original information-gathering process, a large percentage of the information has had to be sourced from individuals who lived in Otira at different times. Special thanks are due to Bob Williams of Jacksons and Gordon Cunningham of Otira for their assistance in this process – especially for the 1970s and 1980s period. In addition, school registers, Wises and Stones directories and electoral rolls have been invaluable.

There is still plenty of scope to make this list more complete. If you can fill gaps, clarify/correct details etc., or have any queries, please contact us via www.twowrightbooks.co.nz. Once enough new information is at hand, we will make a new version available. It is hoped that the information will be a valuable resource for family historians and researchers, as well as being of interest to those who lived in Otira.

Please note that a small 's' following a date (e.g. Mar 1966s) means that the date is based on school register information. The school date has only been used when there is a high degree of confidence that the family left Otira around the same time.

Please also note that superseded job titles have sometimes been used for simplicity and to avoid uncertainty as to when titles changed and also when the original term was still in common usage. For example, *engine driver* has been retained rather than *locomotive engineer*. The role of *porter* in Otira in the 1940s and earlier equates roughly to *traffic assistant* (i.e. it was shunting as well as platform work). Later on, *traffic assistants* became *traffic operators*. Sometime during the 1960s, the term *shift clerk* was replaced by *section officer*.

HOUSE WANTED! Quite a number of 1920s and 1930s families have been placed since version 1 was released, due to contact with several ladies in the 86-90 age bracket who lived in Otira as children. New information has been regularly sourced through contacts and going through a number of the Westland electoral rolls. There are still many rolls to go through from the 1920s-80s period. The following names have not been able to be placed in a house with certainty as yet, although some may have lived in houses other than the 1922/23 railway houses. If you can help, please get in touch.

Note: if first or middle name (as per electoral roll) is in bold it means that that is the name that is listed in the Wises Directory
